## White Single Shaker Cabinet Construction

Our cabinet doors are created with the highest quality Birch - a strong and durable hardwood whose beautiful features make it a perfect wood type for modern furniture.

Our cabinet carcasses are constructed with all-birch plywood with wood veneer. No formaldehyde is added during our plywood manufacturing process. Our sides, bottoms, and shelves are 3/4" plywood, reinforced through a 3/4" plywood hanging rail.

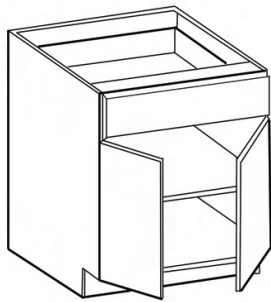

Our drawer boxes are held together through dovetail joint construction and all drawers come with under-mounted, full-extension, soft-closing, ball-bearing slides.

Should any of our products fail under normal use due to defects in material or workmanship within these ten years, Sensi Home LLC will, at its discretion, repair or replace the defective part. This warranty is not valid for products used for any purpose other than the purpose for which they were originally intended. This warranty is limited to the replacement or repair of the defective product only and does not include service, labor, or transportation costs, regardless of whether work was performed by a specialist or yourself. Natural variations in color and grain patterns are inherent characteristics of wood. Repair or replacement is subject to the present product offering of Sensi Home LLC at that time. No dealer, agent, contractor, or installer may change or extend this warranty. In place of any other warranties, this warranty shall represent the entire liability of Sensi Home LLC. All styles, finishes, and specifications are subject to change without prior notice.
